Airbnb concept

We are creating a farmhouses that bridges the gap between rural tranquility and modern hospitality. The project offers city dwellers private, nature-immersed escapes while helping property owners monetize their unique agricultural land.

BIODIVERSITY

Birds Wetlands

Nestled along the Gangetic floodplains, this eco-hotspot is home to over 300 bird species—including majestic Sarus Cranes, Painted Storks, and rare Asian Openbills. A peaceful morning walk or cycle along its scenic trails offers nature lovers a front-row seat to spectacular winter migrations and vibrant native birdlife.
